In spite of this decrease in revenue the Company posted net profit of Rs. 72.34 lacs as against loss of Rs.381.36 lacs in the previous year. In addition, at an operating level, the company's performance improved substantially primarily on account of reduction in prices of raw materials and overall improvement in plant productivity and efficiencies.

During the year under review there was no change in the Share Capital Structure.

In view of inadequate profits, Directors do not recommend any dividend.

HUMAN RESOURCE DEVELOPMENT (HRD) & INDUSTRIAL RELATIONS:

In April 2015 a small group of workmen resorted to illegal strike, which resulted in minor production disruption for about a week. However, the majority of the workers continued to work and streamlined production in the shortest period. Since then the production is continuing smoothly. Barring this incident and except a small section of workmen who are still non-cooperative to the management, the Company continues to have cordial and harmonious relations with its employees. Your Directors place on record their appreciation for the commitment, dedication and hard work put in by the employees of the Company during testing times.

The Company is in the process of implementing a revised HRD program for developing better labour relationships. The company has adopted new policies to recruit, develop and retain skilled manpower. With an aim to expand product range and operations, the Company has made several new appointments to its existing team in various departments.

QUALITY, SAFETY & ENVIRONMENT:

The Company has appointed an experienced and accomplished professional to head the Quality Assurance function. Under his supervision, the quality team is actively engaged in overhauling quality systems and procedures to improve regulatory compliance. The company has also initiated efforts to register its products in regulated markets. The company is taking steps in the right direction to resume its supplies to regulated markets.

The company has successfully completed the expansion of effluent treatment facilities in FY 2014 – 15. The company is working continuously to reduce waste generation and environmental load. In addition, the company is engaging and training employees to continuously improve working practices to meet zero accident level.

RESEARCH AND DEVELOPMENT (R&D)

R&D investment was higher in FY 2015 – 16 in comparison to the previous financial year. However, as the company's financial performance is improving, the company is increasing its R&D spends in the next financial year to develop new products and improve processes of existing products.

CORPORATE GOVERNANCE

The Company has complied with the mandatory requirements of the code of Corporate Governance as detailed in clause 17 to 27 of the SEBI (Listing Obligations And Disclosure Requirements) Regulations, 2015.

Corporate Governance Report is enclosed as a part of the Annual Report along with the certificate from the Statutory Auditors, M/s. Ashok Madgundi & Co, Chartered Accountants, Solapur confirming compliance of the code of Corporate Governance as stipulated para E of schedule V of the Securities and Exchange Board of India (Listing obligations and Disclosure requirements) Regulations, 2015.

MANAGEMENT DISCUSSION AND ANALYSIS

Business of the Company and Future Outlook:

The company continues to be driven by focus on improving profitability. The company's product portfolio rationalization and marketing focus on high margin products, which was initiated in the previous financial year, has delivered good results at the profitability level in the current financial year. Although product portfolio rationalization has had a slight negative impact on sales, the impact on operating margin and bottom line is significantly positive in the current financial year of 2015 – 16.

The company has also had significant successes in reducing cost through process and operational improvement. The company's measures to reduce operating costs under taken in the current FY 2015 – 16 have borne fruit, which has directly contributed to the bottom line. The company is increasing its efforts to work on cost reduction and is seeing good progress in this direction.

With the improvement in the company's financial performance, the company is expecting reduction in its cost of capital. Given no significant plans to raise additional debt, the company is placed in a very strong position to improve its P&L due to reduced cost of capital and balance sheet due to reduced debt.

The company is actively pursuing three key avenues for not only boosting growth in sales but also more importantly accelerating growth in profitability:

1. **Volume Push:** The addition of new customers over FY 2015 – 16 will enable the company to achieve significant volume growth of key products going forward. Any incremental volume growth over FY 2015 – 16 will contribute directly to the bottom line, thus taking the company in the direction of higher profitability.
2. **Regulated Markets:** The company is applying to European Directorate for Quality of Medicines (EDQM) for Certificate of Suitability (COS) for its key products. Upon successful approval from EDQM, the company shall be able to open up new markets such EU and allied markets such as Turkey and some Middle Eastern countries. The access to these markets will result in realization of higher margins due to premium pricing dynamics of these markets.

3. New Products: The company is developing several new products to be launched this FY 2016 – 17 through investments in internal as well as external R&D. Although the product pipeline has the potential to boost sales in the short to medium term, they are more likely to provide a robust base for long term growth of the company.

Opportunities & Threats:

Regulated markets of EU and allied markets such as Turkey and some Middle Eastern countries offer tremendous opportunity for overall growth of the company. The company is actively pursuing this opportunity by working towards gaining access to these markets. The company is in the process of inviting EU regulatory bodies for granting approval to its facilities, which will allow the company to supply its products to these markets.

The market of Metformin HCl, one of the company's key product, is showing robust growth year on year. However, increased competition and aggressive marketing push by competitors has put negative pressure of prices of Metformin HCl in current markets catered by the company. The company is de-risking itself by entering new markets such as EU, Latin America, etc., which will not only reduce the threat of lower prices but also boost volume growth.

INTERNAL CONTROL SYSTEMS: The Company has adequate internal control procedures commensurate with the size of the company and the nature of its business with regard to purchases of inventory, fixed assets and with regard to the sale of goods. However, to improve these systems, the company is planning to implement a suitable ERP system in FY 2016 – 17.

FINANCIAL PERFORMANCE: The Financial results and performance for the year are elaborated above in this Report.

CAUTIONARY STATEMENT: Certain statements, estimates and expectations stated in this Management Discussion and Analysis are based on the current perceptions, data and information available with the Company and may be 'forward - looking statements' within the meaning of applicable securities, laws and regulations.

They reflect the company's current views of future events which are subject to risks and uncertainties, Important factors such as change in the competition scenario in the Company's areas of operations, economic conditions affecting demand/supply and prices situation in the domestic and international market, changes in government regulations, tax laws and other incidental factors may cause actual results to be materially different.
